

Semitropic to Hold Public Scoping Meeting for Delta Wetlands Project Place of Use EIR

Semitropic Water Storage District has supplemented its Notice of Preparation (NOP) to prepare an Environmental Impact Report (EIR) for the Delta Wetlands Project. The lead agency, Semitropic, is providing an additional opportunity to comment on the scope and content of the environmental information in connection with the Project in light of the place of use figures provided in the Supplemental NOP. The documents can be viewed at <http://deltawetlandsproject.com>.

To solicit public input on the scope of topics to be included in the EIR, Semitropic will hold a public scoping meeting. The meeting format includes a brief presentation, followed by open house-style interaction with the project team. If you submitted comments during the previous scoping period you do not need to resubmit them.

Friday, July 17th, 10 a.m. – 11:30 a.m.

ICF Jones & Stokes, 630 K St., Ste 400, Sacramento, CA

Written comments or questions may be sent by mail, email or fax no later than 5 p.m. Fri., July 31, 2009, to: ICF Jones & Stokes, Attn: Megan Smith, 630 K St. Ste.400, Sacramento, CA 95814; email msmith@jsanet.com; or fax 916-737-3000.
